PROFILE SUMMARY

Software Engineer with over 2+ years of experience in building scalable applications using .NET Core, and SQL Server. Skilled in RESTful API development, micro services, and cloud integrations (Azure). Strong foundation in data structures, algorithms, and design patterns, optimizing performance and maintainability.

EXPERIENCE

Ministry of Foreign Affairs (Afghanistan).

Software Engineer (Contract Based)

Kabul, Afghanistan

Dec, 2024 - Present

- Developing and maintaining **web applications** with a focus on performance and scalability.
- Designing and implementing **secure authentication and authorization** systems.
- Managing **database operations** and optimizing data handling processes.
- Developing **RESTful APIs** to ensure seamless communication.
- Building **responsive and user-friendly interfaces** using modern front-end technologies.
- Implementing **best coding practices** to enhance maintainability and scalability.
- Conducting **testing, debugging, and performance optimization** to improve system reliability.
- Collaborating with cross-functional teams to meet project requirements and deadlines.
- Securing documents from unauthorized third-party access and securely transferring them to end users
- Worked on **FMIS (Financial Management Information System)** for income and expense handling of both foreign branches and internal departments of the Ministry of Foreign Affairs.
- Developed and maintained systems for inventory and procurement management.
- Implemented an Entry Gate System to monitor and track visitors.
- Built a Document Tracking System to ensure efficient and secure handling of official documents across departments.

AFGOU Organization

Software Engineer (Project-Based)

Remote

Nov, 2023 - July, 2024

[Visit Website](#)

- Hired to **maintain and enhance an existing e-learning platform** designed to deliver courses to students in Afghanistan.
- Worked on **bug fixes, performance optimizations, and feature enhancements** to improve system stability and user experience.
- Managed **backend development and database operations**, ensuring smooth data flow and security.
- Improved **UI/UX responsiveness** and integrated updates to enhance accessibility.
- Provided **technical support and troubleshooting**, ensuring minimal downtime and optimal functionality.
- Collaborated with the team to implement **best coding practices and maintain system scalability**.

.Net DEVELOPER Intern

Devdudes IT Solutions

Aug 2022 – Sep 2023

Johar Town Lahore, Pakistan

- Assisted in the **development and maintenance** of web applications using **ASP.NET Core and C#**.
- Gained hands-on experience in **backend development, API integration, and database management**.
- Worked on **bug fixing, performance optimization, and feature enhancements**.
- Developed and tested **RESTful APIs** to support application functionality.
- Collaborated with senior developers to follow **best coding practices and design patterns**.
- Enhanced knowledge of **Entity Framework, SQL databases, and authentication mechanisms**.

TECHNICAL SKILLS

- **Languages/Frameworks:** C/C++/C# 5.0 - 12.0, **Java** (basics), **.NET Core** 8.0/7.0/6.0/5.0, ASP.NET Web API, MVC, Entity Framework Core, XUnit
- **Front-End:** Blazor, Bootstrap, HTML5, CSS3, JavaScript, jQuery, React (Basic)
- **Cloud/DevOps:** Microsoft Azure (Service Bus, SQL Database, Azure Key Vault, Azure Cognitive Services, GitHub Actions for Azure), GitHub Actions,
- **Databases:** Microsoft SQL Server, LINQ, MongoDB
- **Software Architecture:** Microservices, Design Patterns, SOLID Principles, Distributed Systems
- **APIs:** RESTful APIs, GraphQL (Basics)
- **Development Practices/Tools:** Agile, CI/CD, Visual Studio, Swagger, Postman, Jira, Bitbucket, GitHub
- **Reporting Tools:** RDLC, Crystal Report, SQL Server reporting Services

EDUCATION

BS (CS) PUCIT - Punjab University College of Information Technology (University of the Punjab, Lahore)
Higher Secondary (General Science) Sayeed Jamal u Din Lyca (Rawalpindi)

DEC 2020 – Jun 2024
2006 AUG – 2018 Jun

PROJECTS

Playing Field Booking System

- Developed an application for User to book playing fields in advance, optimizing field allocation and utilization.
- Utilized .NET Core Web API, REACT, Azure, Entity Framework Core, and SQL Server following a clean architecture approach.

AN ML Project to Predict House Prices in USA

- Built a real-time accident Prediction system using **Linear Regression** Machine learning model to Predict Price of houses in the USA **92+** % accuracy.

Knowledge Quest

Developed Android app using Java which calculate CGPA of Student's According to PUCIT CGPA Calculating Rules and suggest Student to whether withdraw course or take according to CGPA

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900) • GitHub Foundations
- Certified Project Management

ACHIEVEMENTS

- Secured **5th Place** in PUCon'23 PUCIT Web Hackathon 2023.
- Achieved a **90.22%** problem acceptance rate across 100+ LeetCode problems
